 - 3) The 3rd G-to-G project is in Chongqing, known as 'China-Singapore (Chongqing) Demonstration Initiative on Strategic Connectivity'
- Four main areas of collaboration:
 - Financial services
 - Aviation
 - Logistics
 - Information Technology

什么是自贸区？

指在一国的部分领土内运入任何货物，被认为在关境以外，并免于实施惯常的海关监督制度。目前世界上有600多个自由贸易港，例如巴拿马科隆自贸区、德国汉堡自贸区、香港等。

DETAILS OF CHINA'S FREE-TRADE ZONES

What is a Free Trade Zone (FTZ)?

A FTZ is an area set up in a sole country or region within which goods may be landed, handled, manufactured or reconfigured, and re-exported without the intervention of customs authorities. It is set up with the aim of lowering international trade cost and boosting export and international investment.

Differences between Bonded Areas and FTZs:

- 1 Import and export of goods are customs supervised in Bonded Areas but not in FTZs.
- 2 Most goods in FTZ are managed by gate sentry whereby procedures are simplified and the transaction costs are lower. Goods in Bonded Area are managed by bookkeeping since the tariff and tax exemption are only temporary.
- 3 FTZ acts as a logistics distribution center with large volumes of goods flowing in and out with well-developed trade processing which will lead to regional economic development. Bonded Area mainly serves as entrepot, not a major impetus to regional economic development.

Why Chongqing?

- Strategic and pivotal role as the gateway to western China.
- Location: Liangjiang New Area, the western logistics park and a micro-electronics park
Size: 120 sq km
Focus: To attract investments to western China
- Next step:
 - Ministry of Commerce will meet with the relevant departments to study the FTZ program and perform all necessary checks before implementation.
